

Enhancing HVDC performance and reliability

State-of-the-art MACH control and protection system to be installed into Kontek HVDC interconnection

Control System upgrade

of 600 MW
HVDC link between
Germany and Denmark

The modernization will help enhance the operational reliability of the link and reduce maintenance needs.

This upgrade reinforces ABB's focus and commitment to supporting customers throughout the lifecycle of the products and systems it delivers. It also underlines the company's growing focus on service business.

Power and productivity
